

2030 Sustainability Goals

Innovations

01

Align 100% of the our innovation portfolio to meaningfully advance the UN SDGs and create value for our customers

02

Integrate circular economy principles into our business models considering lifecycle impacts in the markets we serve

03

Design 100% of our products and processes using sustainability criteria including the principles of green chemistry

Operations

04

Reduce greenhouse gas (GHGs) emissions 30% including sourcing 60% of electricity from renewable energy, and deliver carbon neutral operations by 2050

05

Implement water strategies across all facilities, prioritizing manufacturing plants and communities in high-risk watershed, and enable millions of people access to clean water through leadership in advancing water technology and enacting strategic partnerships

06

Further our commitment to zero injuries, occupational illnesses, incidents, waste and emissions

People

07

Become one of the world's most inclusive companies, with diversity well ahead of industry benchmarks

08

Create a workplace where employees report high levels of well-being and fulfillment

09

Improve over 100 million lives through targeted social impact programs
